

August 2020 note:

Dear Gluten Free Friends,

This company makes masks with a filter for people who struggle with toxic scents and that is to whom they market.

Because of covid, others have ordered masks and the website will say sold out. Early Tuesdays, they work to be restocked for the website. Call early Tuesday if you wish to order a mask to keep out the toxic scents. These masks are sold and marketed for those who struggle with toxic scents often found in products that have fragrances. A filter is in the mask.

I Can Breathe! Masks / filter
